“A teacher is a compass that activates the magnets of curiosity, knowledge, and wisdom in the pupils. - Ever Garrison”

I am extremely happy to share with you all that we have progressively edified our capacity to create a truly unique teacher education college. We have excelled in every initiative that we undertook and we have stood together in facing the challenges in realizing quality education.

In my view, four things are required to make a college unique and exemplary: wonderful students enjoying a tremendous student experience; very successful faculty; a supportive campus learning environment; and substantial resources. A lively institution makes an impact on everything it touches on the minds, thoughts and characters of students, in this world of fast evolving ideas, MIT VGTTA B. Ed College acts as catalyst to transfer knowledge and innovations to the world beyond our campus, and on the communities with which we engage, locally and around. We inspire our students to be lifelong learners.

Here I would also like to reiterate the role you play in the expansive society. As teachers, you are entrusted with the role of influence on the lives of students you will be teaching or are teaching. I would appreciate to see that you use this influence to direct the development of these children positively. You should always endeavour to uphold good morals and act as an inspiration to them and society at large.

Dr. Saroj Jain
Principal
